Platform Architecture & Value Proposition

Platform Architecture — Omnichannel CRM CDP AI

Description: Platform Mekari Qontak terdiri dari 3 lapisan terintegrasi.

Layer	Component	Function
Customer Interaction & Business Operation	Omnichannel + CRM	Semua percakapan dalam satu inbox. Pipeline deal, tiket, dan data pelanggan tercatat otomatis
Customer Intelligence	Customer Data Platform (CDP)	Satu profil pelanggan real-time. Data dari

Layer	Component	Function
		semua touchpoint terpusat
Digital Workforce Automation & AI	AI Automation	AI bekerja di seluruh funnel: kualifikasi lead, resolusi tiket, reminder repeat purchase

Note: Omnichannel dan CRM terhubung dua arah secara otomatis — bukan integrasi, tetapi satu sistem.

Value Proposition — Unified Customer Engagement Platform

Key Differentiators:

- End-to-End: Dari interaksi pertama sampai pelanggan kembali lagi, semua dalam satu platform
- Unified System: Data pelanggan, pipeline, tiket, dan AI bekerja dari satu tempat
- Intelligent AI: AI membaca konteks pelanggan dari CDP lalu bertindak
- Flexible Use Case: Tersedia untuk sales, service, atau kombinasi keduanya

WhatsApp Business API Requirements

Meta WhatsApp API Onboarding Requirements

Description: Untuk menggunakan WhatsApp Business API melalui Qontak sebagai BSP, klien harus memenuhi persyaratan Meta.

Requirements: | Requirement | Description | |—|—| | Facebook Business Manager Account | Akun Meta Business Suite aktif | | Business Verification | Verifikasi legal bisnis di Meta | | Valid Phone Number | Nomor dapat menerima OTP | | Approved Display Name | Nama bisnis disetujui Meta | | WhatsApp Policy Compliance | Bisnis tidak termasuk kategori prohibited | | Official Website | Dibutuhkan untuk business verification | | Legal Business Documents | NPWP, NIB, SIUP, atau akta perusahaan |

Business Verification Meta — WhatsApp API Verification

Description: Proses Meta memverifikasi legalitas bisnis sebelum WhatsApp API dapat digunakan secara penuh.

Required Documents:

- NIB atau SIUP
- NPWP
- Utility bill perusahaan
- Website resmi perusahaan
- Email domain perusahaan

General Process: 1. Login ke Meta Business Manager 2. Buka Security Center 3. Klik Start Verification 4. Isi data legal bisnis 5. Upload dokumen 6. Verifikasi domain atau alamat bisnis 7. Tunggu review Meta 1–5 hari kerja

Common Rejection Causes:

- Nama bisnis tidak konsisten
- Dokumen expired
- Alamat bisnis tidak sesuai
- Website tidak valid

WhatsApp API Phone Number Requirements

Requirements: | Rule | Description | |—|—| | OTP Verification | Nomor harus bisa menerima SMS atau voice call | | Not Active on Regular WhatsApp | Nomor harus dilepas dari WhatsApp biasa sebelum migrasi ke API | | One Number One WABA | Satu nomor hanya untuk satu WhatsApp Business Account | | No Dual Mode | Tidak bisa digunakan bersamaan di app reguler kecuali Meta Coexistence | | Landline Support | Landline dan toll-free didukung via voice call |

Preparation Before Onboarding:

- Pastikan nomor dapat menerima OTP
- Pastikan akun WhatsApp lama sudah dihapus jika ingin migrasi
- Tentukan apakah menggunakan nomor baru atau nomor lama

Meta Coexistence — WhatsApp App & API Together

Description: Meta Coexistence memungkinkan nomor yang sama digunakan untuk WhatsApp App dan WhatsApp API secara bersamaan.

Availability:

- Service Suite
- Sales Suite
- Qontak 360
